

KENNETH CHUKWU

Full-Stack Developer · TypeScript / React / Next.js / Node.js / Python

Rostov-on-Don, Russia · +7 980 836-38-47 · +2348134710016 · chukingroup@gmail.com · chukvu@sfedu.ru · github.com/Cina-ken · Open to remote

PROFILE

Full-stack developer shipping production web applications in TypeScript and Python. Completing an M.Sc. in Modern Software Development at Southern Federal University, with thesis research on predicting CI/CD pipeline failures using machine learning. Four years of prior experience in IT infrastructure and health data systems, including two years supporting a British diplomatic mission. Comfortable owning a feature end to end: schema and API design, authentication and access control, third-party integrations, tests, and deployment.

SELECTED PROJECTS

MarketCap: Stock market dashboard with live quotes, historical charts, and a Stripe-gated watchlist

Next.js 16 (App Router) · React 19 · TypeScript · Supabase (Postgres, Auth, RLS) · Stripe · Recharts · Docker · GitHub Actions

- Enforced per-user data isolation with Postgres Row Level Security at the database layer rather than in application code; a single service-role client, scoped to the Stripe webhook handler, is the only intentional bypass.
- Split market data across two providers after hitting Finnhub's paid-tier gate on historical OHLC, and built the portfolio aggregation to cap fan-out at 8 parallel requests, tolerate individual timeouts, and reduce to the date intersection actually returned — instead of dropping tickers silently or failing the whole chart.
- Wired Stripe Checkout, Billing Portal, and webhook-driven subscription sync end to end; multi-stage Dockerfile and CI running lint, tests, and a production build on every push.

marketcap-jade.vercel.app · github.com/Cina-ken/Market_Cap

D2 Terminal: Multi-page booking site for a Rostov-on-Don beauty salon (Russian-language, live client site)

Next.js · React · Tailwind CSS · Responsive design · Structured SEO metadata

- Built a five-page site with an online booking flow that replaced phone-only scheduling, including service selection, date/time picking, and Telegram/WhatsApp fallbacks.
- Implemented full Open Graph, Twitter Card, and localised ru_RU metadata plus a filterable portfolio gallery; delivered and maintained for a live business in a second language.

d2terminal.vercel.app

Client & Demo Front-Ends: Four responsive marketing and e-commerce builds

- Service-business landing pages (Birmingham plumbing, auto detailing), a corporate landing template, and an e-commerce product page with variant selection, image gallery, and cart state, all Next.js, Tailwind, and mobile-first.

Live: birmingham-plumbers-co-uk.vercel.app · auto-detailing-in-birmingham-fco5.vercel.app · business-landing-iota.vercel.app · ecommerce-demo-sandy-six.vercel.app

TECHNICAL SKILLS

Languages TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frontend React, Next.js (App Router), Tailwind CSS, Recharts, responsive and accessible UI

Backend Node.js, Express, FastAPI, REST API design, JWT/OAuth authentication, Server Actions

Data PostgreSQL, MongoDB, Supabase, schema design, Row Level Security, query optimisation

Infrastructure Docker, GitHub Actions CI, Vercel, Git, Linux, Vitest, Stripe integration

EXPERIENCE

Administrative & Technical Support Officer · British Deputy High Commission, Lagos

Aug 2023 – Dec 2024

- Administered workstations and secure communication systems for diplomatic staff, handling provisioning, patching, and security updates across the mission.
- Maintained digital asset and inventory databases, owning data integrity and the repair/replacement lifecycle for office equipment.

Technical Officer / IT Support Officer · ECEWS, Abakaliki

Jan 2023 – Aug 2023

- Ran frontline support across hardware, software, and networking, and assisted with infrastructure deployment, upgrades, and performance tuning.
- Maintained organisational databases and delivered user training that improved adoption of internal digital tools.

Technical Officer (Call Centre) · Emergency Operations Centre, Ebonyi State Ministry of Health

Oct 2021 – Dec 2022

- Kept health communication platforms and call-routing systems available in a high-volume centre; daily system health checks and fault escalation.

Data Officer · Ebonyi State Ministry of Health, Epidemiology Unit

Jan 2020 – Sep 2021

- Processed and analysed large surveillance datasets for epidemic monitoring, maintaining structured databases and enforcing data security protocols.

EDUCATION

M.Sc. Modern Software Development · Southern Federal University, Rostov-on-Don

Expected Aug 2027

- Thesis: machine learning-based prediction and optimisation of CI/CD pipeline failures in DevOps environments (LightGBM/XGBoost, SHAP, FastAPI).

B.Sc. Biochemistry · University of Port Harcourt, Nigeria

2015 – 2019

CERTIFICATIONS & LANGUAGES

Full Stack Software Engineering (Udemy, 2023) · Web Development (Kachitech, Lagos, 2024) · Google IT Support Fundamentals (2024) · AI Essentials (ALX, 2024)

Languages English (fluent) · Russian (working proficiency)
